Er. Koneru Satyanarayana

Edupreneur with a differnce

Dear Readers,

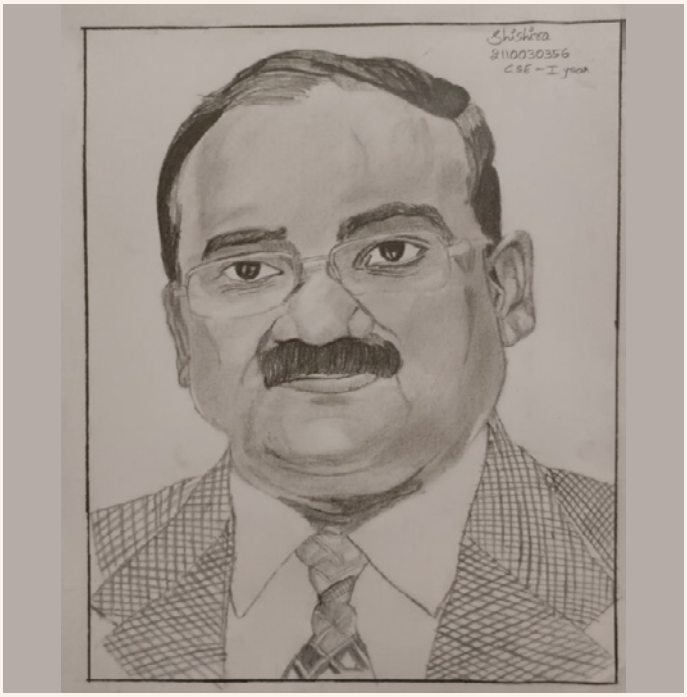

It is with great pleasure that we present to you the 5th edition of the KLH Young Times. The hottest month of the year has arrived and we are in the end of the academic year. Everything is back to normal after the Ivarna2022 event. Students are busy preparing for examinations. Seniors are all set to leave the campus and explore their paths. This issue comprises of our teacher's remarkable achievements, Bid- Adieu to the final year outgoing students, and many more interesting articles.

We hope to continue our journey with many more memories and with great work.

Happy Reading.

OBITUARY

IN HONOR OF

PROF. LSS REDDY

FORMER VICE-CHANCELLOR ON HIS DEATH ANNIVERSARY

KL Deemed to be University, Vijayawada & Hyderabad, India

If Lord God or Arjuna of Sri Bhagavad Gita needs no introduction for readers

The former Vice-Chancellor LSS Reddy Garu too was an acknowledged leader of leaders.

What pace of walking, what neatness in accouterment, what manner of conversation,

What skillfulness in Administration, what gab in oration?

What an inspirer to the Students and to the Teachers, what an infrequent Organizer,

What a charismatic man in appearance, what a piece of work is the Vice-Chancellor!

We adore you, Sir! Our Vice-Chancellor, Professor LSSR Born as a part of Lord Brahma,

you were busy with the University's creation of Honorable President Sir's Vision

Whatever development you see today in the KL Deemed to be University is the hallmark of your execution

Everything is the workmanship of Sri LSSR, the Great Man!

Though a life-long scholar of the subject of Computer Science

You have evinced in your laconic witty talks a stamp of great genius

You are unparallel with your varied interests in many a subject

You have undoubtedly created a great void with your abrupt eject.

Your rare commitment to the University will surely find a place in its Heath

On the Sunny days and Moon-bleached nights, we shall garland you with a wreath

Nobody deserves this rare honor as you richly occupy such a position

We always imagine your steady presence on the Campus with your Blessings benign.

We the Students and Faculty adore you, our Hon'ble Vice-Chancellor

You are certainly a part of the Great Divine Order

You with your sterling qualities constantly dazzled our inner being

You are ensconced in each of our hearts like the ideal citizens' King.

You will be saddled on the Royal Elephant on your peripatetic journey

To the Heavenly abode, you are bound without the help of any attorney

By your pious deeds, you have deserved a seat in God's Heart

You will occupy an enviable place in Heaven if this is your start.

When you go to the ethereal plane, you are sure to occupy a high echelon

You will be regarded amongst the Heavenly people as an Angelic Gentleman

If perchance by your chastened influence we find a place in the heaven

It is more than enough if you from your high pedestal shoot a smile anon.

For the moment, please permit us to bid adieu to you, Sir LSSR

We pray to God fervently for your smooth sail to God's abode, Heaven

Your dear Students, Faculty, Officers, and the Staff are paying you their homage

Let Your Soul Rest in Peace in the ethereal place as per the good adage.

ACHIEVEMENT OF FACULTY

Aishwarya V, 1st CSE

Pillars of India recognition is a sincere initiative to recognize and acknowledge the best contributions in their professional fields of own-self who have contributed directly or indirectly to benefit the society or nation in any which way.

Dr.Savadam Balaji sir received an award “Dr.APJ Abdul Kalam Pillars of India Award “ which is facilitated by the hon’ble vice-chancellor of KL. This event was held on November 27th, 2021. The certificate was received on May 25th, 2021. Dr.Savadam Balaji sir is working as an associate dean at KL University, Hyd campus, a technocrat with exposure to industry academics and research. Education of M.Tech and Ph.D. is done in cyber forensics, with specific research interest in the field of cyber security and IoT. He has more than 28years of teaching experience in various Engineering colleges. Presently guiding 8th Ph.D. scholars under KL University and M.Tech students in KLU.

Congratulations on this wonderful achievement dear sir !!

In Recognition of Skilled Artisans: Honorable Vice Chancellor,

Dr. GBP Verma Garu

Felicitated Faculty Members With Skill Excellence Certificates And Best Teacher Awards In A Special Ceremony

AWARD CEREMONY

KL HYDERABAD held an Award ceremony to appreciate and encourage the faculty who are working hard in shaping the future of Kl students. As a part of the event the most honorable award of the ceremony, the Best teacher award was presented to Mrs. Girija and Mrs. Deepa. It's a great honor to the teachers as well as the university to have such faculty. This award shows us their dedication to their work. After presenting the Award, our respected principal sir felicitated them. It was followed by Sunitha mam's speech, where she spoke about her journey. It was a little emotional and proud moment for mam and then Mrs.Deepthi mam also delivered a short speech. She said, "THIS AWARD MADE ME FEEL MORE RESPONSIBLE". Dr. Deepa of MBA got the Best teacher Award.

Their speech was very motivational to the students. Students took a group photo with the faculty to save it as a memory. In simple words, the event was an eye feast to watch. At last principal, sir addressed every faculty for their 100% effort in training the students towards their goals and said **"EVERY TEACHER IN KLU IS A STEP WHICH LEADS YOU TO YOU DESTINATION"**

AN INSIGHTFUL SESSION BY Mr. DOMINIC GODFRED

On 26th April 2022 (Tuesday), Mr. Dominic godfred the manager of the Time Group visited the klh global business school, konadapur branch for a guest lecture. He started the session by introducing himself and the areas of The Time Group's expertise. He then started talking about one of the publishing Time Group newspapers "The Economic Times". He asked students, How is the Economic Times paper color different from other newspapers ?. He also asked students to name the color. The answer to that question ended up being whitish Salt pink. He then continued the session by explaining various topics the paper publishes and the importance of reading newspapers. Later the students and the guest had interactive time through some interesting Q&As. Then Dr. Ramakrishna sir the associated Dean of placements of klh took the stage to give his vote of thanks to the guest. Continuing that the guest was felicitated by **Dr. Koteshwar rao and Dr. Ramakrishna**

By Kalpana, 1st BBA

BIDDING ADIEU TO SENIORS

Every student who begins college life must end it one day. The hour to leave college had come. With the emotional atmosphere around the campus, the students, staff, and the management of the KL Hyderabad bid adieu to the CSE, ECE Students of 2018-2022 Batch at a farewell function. Farewell is nothing but a contrast of emotions. It will make everyone sad and happy at the same time. All the arrangements were done very impressively.The function began well in time. Teachers talked about students and felt happy about the achievements and accomplishments of the students in campus and wished them a happy life ahead with bright careers. Some of them delivered speeches relating to their experience and life in the college. Some of them shared their views about how they will miss the college. It is an emotional rollercoaster. Some students could not stop their tears. The Function

was continued with enthusiastic dance performances, songs, and many more fun activities. The entire program was successful with the help of faculty and students. It is a memorable event for all the students.

It is a tough job to bid adieu to the seniors with whom we have spent more than a year. However, Congratulations to all the seniors and we wish the best of luck to all of you to shine bright in your career and stay healthy.

A GLIMPSE OF THE EVENT

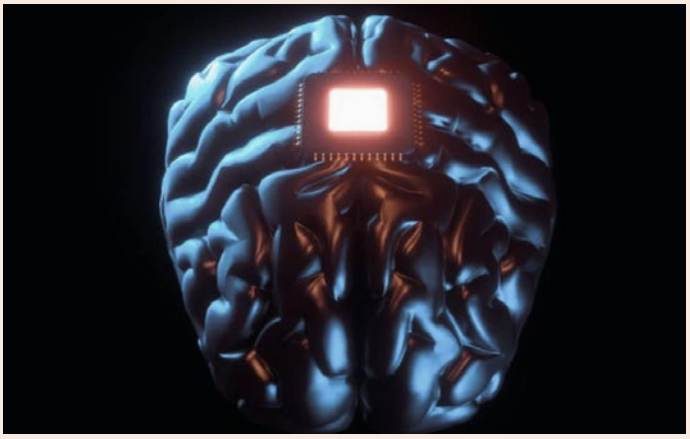

TECH-GIG

NEURALINK

ELON MUSK HAS a talent for describing the most comforting kind of crazy-ass futures. His vision—Mars rockets! Underground electric robot cars!—sells itself as the world of tomorrow, today. But it's the science fiction of yesterday, ripped from the pages of Science Wonder Stories. (Or maybe WIRED circa 1995.) It's lovely that someone is finally building yesterday's pew-pew science fiction priorities. That's especially true of the latest Muskery, presented last week: a new iteration of Neuralink, a wireless implant that could someday give human brains a direct interface to digital devices. Once the company gets past the mere formalities of human testing and government approval and convinces people to pay for the privilege of having a robot surgeon stitch 1,064 wires into their brains, we're halfway to Borgtown, babies. Control prosthetic limbs, play Starcraft with your mind, summon your Tesla telepathically, and eventually upload your consciousness to an immortal robot body. Beep.

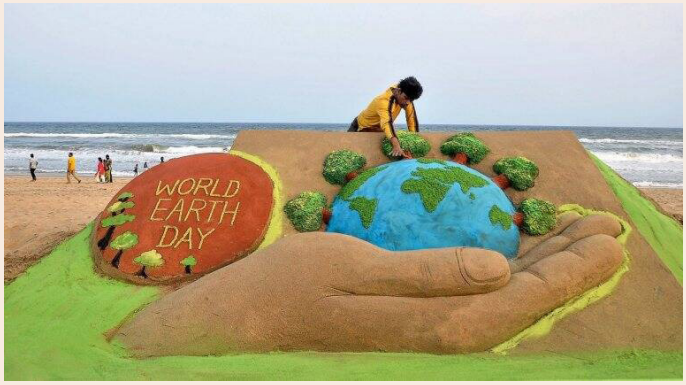

ASHRITH (1ST YEAR CSE)

NEURALINK This technology is very useful for the future generations and this is the upcoming technology which makes the human brain as more faster than the computers This is the biggest revolution which we are going to witness in the nearby future Elon mask is the beginner of this event but it's not yet done it's Just a beginning if the new vision is out then the world going to witness the more incredible stuff hope it comes very soon.

Neuralink is not the only project Elon mask is started but it is one of the projects which gone make the world surprised by its innovation in every sector which makes the human brain much faster and more efficient to work for a long period and it has its specifications which makes it's special in this tech world.

EARTH - DAY

Every year on April 22nd, Earth Day commemorates the 1970 birth of the contemporary environmental movement. Senator Gaylord Nelson established Earth Day in spring 1970 to force the issue onto the national agenda.

People all over the world celebrate Earth Day to show their support for environmental and environmental conservation. Plantation drives, protests, awareness workshops, children's competitions, and other activities are planned for the day. Despite being celebrated almost exclusively in the United States for nearly two decades, Earth Day has now gained international recognition and is observed in over 192 nations. Earth day is a call to action to conserve the environment, repair damaged ecosystems, and live a more sustainable lifestyle.

The climate is deteriorating with each passing day, and it is our responsibility to maintain and conserve Mother Nature. "Invest in Our Planet" is the topic for Earth Day 2022 this year. The theme emphasizes taking risks, innovating

broadly, and implementing fairly and equitably. This day is observed to raise public awareness about how individuals can help save the planet from pollution, global warming, and water scarcity. Our primary responsibility should be to protect Mother Earth. If we do not protect our planet, all of the resources we obtain from it will be deleted after a few years. So, while there is still time, we must take appropriate and effective actions to ensure that future generations will be able to benefit from these resources.

The first way we can protect our resources is to cultivate less land. Every year, large tracts of forest are removed to make way for agriculture. We should aim to grow crops that demand less space, which can be accomplished through crop rotation. Instead of using non-renewable energy sources, we should concentrate on renewable energy sources such as solar, wind, and hydropower. More trees should be planted, and a suitable balance between humans and nature should be maintained. Only in this way can we assure that future generations will be able to benefit from Mother Earth's resources.

Nature has a profound transforming power that is necessary for life on Earth to function. Humanity must thrive, and it is our responsibility to protect it for future generations. Because it is our territory and we live on this planet, everyone must take responsibility for its protection. As a result, it falls on us to look after it.

The Plight of Indian Medico's@ Ukraine

Like many other countries, Ukraine stands on the top of the priority list for medical aspirants all over the globe. Ukraine is widely preferred by MBBS aspirants for its facilities provided an excellent study environment.

Some promising features include :

- Recognized by the Medical Council of India (MCI); The Medical Degree from medical colleges of Ukraine is recognized by MCI and medical colleges are listed under WHO, IMED, and ECFMG medical education directories.
- World Class Infrastructure
- Low Student-Teacher Ratio; for better interaction and quick doubt clarification.
- Practically Oriented Classes; for enhancing skill and expertise.
- Affordable for Indian medical aspirants; the cost of living is low compared to many countries and there's only a slight variation in currency.

Ukraine is a boon to Indian medical students with so many beneficial factors. So many Indian medical aspirants go to study there each year, but unlike the past years, this year is different.

The plight of 18,000 Indian medical students trapped in Ukraine's war zones has led to widespread concerns. While efforts are beingmade for their evacuation and early return to India, several questions arise. Why did they need to go to Ukraine to study? What will happen to their interrupted education? What are the alternatives available to them on their return to India?

The Ukraine-Russia war led to a crisis all over Ukraine in every sector, from education to the economy and from infrastructure to many people's lives to crisis all over Ukraine in every sector, from education to the economy and from infrastructure to the lives of many people. Right now most students are returning to their homes after so numerous efforts taken up by governments.

But the actual problem now is the future of medicos, most of their studies were paused abruptly, and it is very unlikely that they'll resume it in India, due to differences in curriculum. The political turmoil is likely to continue even if the war ends soon. The student's families too will be reluctant to send them back.

Now, there is no way back to go to Ukraine and resume their studies as it's unsure if the war will ever stop, and even if it did, there would be crises all over the country and it'll be almost impossible for the reconstruction of colleges and providing financial support. In such scenarios, the government must come up with the most efficient ways to provide study options to medical students.

Several protests to provide the proper aid to medical students arose and government needs to think about providing a degree Courses like BSc so that the course is done in 3 years and the later proficiency courses taken will add value to their career.

Nikitha G, 1ST CSE

SUMMER HEALTH

Summer is one of the four seasons of the Earth, where days become warmer and hotter. During this season days become longer and nights shorter. Everyone loves summer because it is the best time to go on vacation, spend time near the sea and sunbathe. It is a great time for doing some sports outdoors, spending time with families and friends, and doing picnics. Summertime also

means outdoor concerts and BBQs. While having fun outside, you must stay hydrated. When you're dehydrated, your body doesn't have enough fluid and electrolytes to work properly. Electrolytes are minerals in your body like sodium, calcium, and potassium. They're found in the foods you eat and the fluids you drink.

According to doctors, there's no one-size-fits-all formula for daily water intake. The amount of water you should drink daily depends on your body, your health conditions, your medications, and other factors. Certain conditions like thyroid disease or kidney, liver, or heart problems make it possible for some people to have too much water, while some antidepressants and Non-Steroidal Anti-Inflammatory Drugs (NSAIDs) make people retain water.

Getting enough water every day is important for keeping your body functioning correctly. Your body needs more water when you're in warmer climates, physically active, running a fever, and having diarrhea or vomiting. It's easy to go about your day without thinking about how much water

you've had to drink or forget to take those sips until you start to feel bad. But, especially in the summer heat, water is vital in helping your body stay healthy and hydrated.

Here are some tips to stay hydrated and refreshed during this hot season!!

1. Eat more "water-rich" fruits and vegetables like watermelon, strawberries, grapefruit, peaches, and veggies like cucumbers, lettuce, zucchini, celery, and tomatoes.

2. Choose coconut water over fruit juice. Coconut water generally has fewer calories and added sugars than fruit juice. It is also a good source of potassium.

3. Eat cold soups, preferably those that are broth-based.

4. Move More, Sit Less!! Get at least 150 minutes of aerobic physical activity every week.

5. Wear Sunscreen. Use a broad-spectrum sunscreen with at least SPF 15 for sun protection. Avoid alcohol, sugary drinks, and/or caffeine.

6. Cool down. Proper hydration isn't just about drinking water—it's about regulating your body temperature, too. During summer, when the risk for heatstroke is at its highest, wear light, loose-fitting clothing in light colors.

7. Protect yourself from the sun with hats and other shade accessories.

8. Schedule sports and physical activities during cooler times of the day.

9. Mist yourself with a spray bottle if you become overheated.

10. Probiotics are living microorganisms found in yogurt and other cultured foods and supplements that can help improve your body's bacteria. Probiotics help with several conditions associated with dehydration, including diarrhea.

M.Likhitha Chowdary, CSE 1st year.

PHOTOGRAPHY AND SKETCHES

WORDS OF WISDOM

The Phoenix

About the Phoenix

The phoenix is an immortal bird associated with Greek and Egyptian mythology that cyclically regenerates or is otherwise born again. Associated with the sun, a phoenix obtains new life by arising from the ashes of its predecessor.

- **Associated with the worship of the sun**
- **An eagle, with brilliant scarlet and gold plumage and a melodious cry.**

What a Phoenix Symobilzes

- Immortality
- Speed
- Rebirth, Regeneration & Recovery
- Invulnerability

What we learn from it

“Life is never easy, ever queasy ”

Many obstacles, constraints, and norms. Often they all take over your mental stability. And sometimes, we will be betrayed, sometimes we will fall to zero, life feels unless you get hopeless and you feel like you can no longer take it and want to give up. In such times, remember, hurdles to get better at life, not to cease life. Remember, “To rise like a phoenix, from the ashes” let all the flames(obstacles) consume you(come your way), take inspiration from what you go through and rise high, rise above the sky and show the world what you can do, how you can heal and rise from ashes and cruel claws.!“To rise like a phoenix, from the ashes” let all the flames(obstacles) consume you(come your way), take inspiration from what you go through and rise high, rise above the sky and show the world what you can do, how you can heal and rise from ashes and cruel claws.

JOKES AND RIDDLES

By Dhanashree K.

Joke 1

You: Teacher!

Teacher: Yes?

You: would you punish me for something I didn't do?

Teacher: Of course not.

You: I didn't do my homework teacher.

Joke 2

Reaching the end of a job interview, the Human Resources Officer asks a young engineer fresh out of the Massachusetts Institute of Technology, “And what starting salary are you looking for?” The engineer replies, “In the region of $125,000 a year, depending on the benefits package.” The interviewer inquires, “Well, what would you say to a package of five weeks vacation, 14 paid holidays, full medical and dental, company matching retirement fund to 50% of salary, and a company car leased every two years, say, a red Corvette?” The engineer sits up straight and says, “Wow! Are you kidding?” The interviewer replies, “Yeah, but you started it.”

Joke 3

“I’ve given up social media for the New Year and am trying to make friends outside Facebook while applying the same principles. Every day, I walk down the street and tell passersby what I’ve eaten, how I feel, what I did the night before, and what I will do tomorrow. Then I give them pictures of my family, my dog, and my gardening. I also listen to their conversations and tell them

I love them. And it works. I already have three people following me—two police officers and a psychiatrist."

Joke 4

Mr. and Mrs. Brown had two sons. One was named Mind Your Own Business & the other was named Trouble. One day the two boys decided to play hide and seek. Trouble hid while Mind Your Own Business counted to one hundred. Mind Your Own Business began looking for his brother behind garbage cans and bushes. Then he started looking in and under cars until a policeman approached him and asked, "What are you doing?" "Playing a game," the boy replied. "What is your name?" the officer questioned.

"Mind Your Own Business." Furious the policeman inquired, "Are you looking for trouble?!" The boy replied, "Why, yes sir."

Joke 5

A teacher is teaching a class and she sees that Johnny isn't paying attention, so she asks him, "If three ducks are sitting on a fence, and you shoot one, how many are left?" Johnny says, "None." The teacher asks, "Why?" Johnny says, "Because the shot scared them all off." The teacher says, "No, two, but I like how you're thinking." Johnny asks the teacher, "If you see three women walking out of an ice cream parlor, one is licking her ice cream, one is sucking her ice cream, and one is biting her ice cream, which one is married?" The teacher says, "The one sucking her ice cream." Johnny says, "No, the one with the wedding ring, but I like how you're thinking!"

Joke 6

The cool part about naming your kid is you don't have to add six numbers to make sure the name

RIDDLES

1. Which is faster, hot Or cold?
A. Hot, Cause you can easily catch a cold.

2. Every day I get my assignment, and I always fulfill it. But every time I do get scolded, what am I?
A. An alarm

3. What's the difference between England and a teabag?
A. A teabag could stay in the cup for longer.

4. How does the ocean say hello?
A. It just waves.

5. I Am Lighter Than Air But a Hundred People Cannot Lift Me. Careful, I Am Fragile. What Am I?
A. Bubble.

6. What English word has three consecutive double letters?
A. Bookkeeper

SPORTS ACHIEVER:
OUR KLH STAR

Mr. Baddam Arun Goud

Sports play a major role in our life. A student can have excellent mental and physical growth and mental toughness if he keeps on playing various kinds of sports in his life. Students who spend a lot of time playing games and sports find themselves refreshed for the mental activity that is required for academics. Children can sit much more calmly, and the attention needed to understand concepts and learn new skills becomes easy.

Do you know what makes a person successful?

To earn a lot of money? Well, no. Setting a goal in life, chasing them with dedication, and eventually making a person successful when you achieve it be it in any field like sports, software, films, etc...And here is our star who was very interested in playing Volley Ball after drawing his inspiration from Micah Christenson, an American volleyball player. His parents Mr. B. Krishna Goud and Mrs. B. Bhagya Lakshmi was very supportive.Let's take a moment to appreciate our KLHian, Mr. Baddam Arun Goud of 1st year CSEfor his contribution towards sports. He started his training in Volley Ball at the age of 12 in Saroornagar Indoor Stadium along with his academics. His passion and interest in Volley Ball in no time made him play at the district level for the district Ranga Reddy continuing with National Level Volley Ball. His hard work bore fruits and he won a Silver Medal in the same. He also represented our college KLH in South Zone Games held in Chennai. Recently he played another national level match namely Monfort Youth National in Uttarakhand.

As we say there is no end to success and we can achieve anything with our hard work, determination, and belief, let's congratulate and wish him all the success in the future. The sky is the limit. Reach heights buddy.

BEST OF LUCK.

B. Akshaya, CSE, 1st year.

Make a Smart choice
Explore endless possibilities

A Feather in the Cap

The Next-Gen Global B School under the flagship of KLH was inaugurated amid the impetuous surrounding of MNCs at Kondapur, its conglomeration of modernity and aesthetics in principle and practice to cater for the most ambitious B school ambience with a global curriculum to be delivered by the experts are drawn from IIMs and Top industry leaders.
